

Circle Weaving

Start by wrapping the string around the plastic circle. Move one space over as it wraps around. Do not pull tight, string should be loose. Tie the last section to the plastic.

Next, wrap the string around the center to bring all the spokes to a point. At this point adjust the point to be in the middle.

Start wrapping yarn around the string alternating over then under.

Near the halfway point, wrap the plastic circle in fabric or yarn. Glue to secure.

Play around with textures. Have fun.
